

PROFESSIONAL SUMMARY

Versatile full-stack developer with extensive experience in React, Node.js, and AWS, specializing in enterprise-scale digital transformation. Proven track record of building scalable, user-focused applications and improving system performance. Skilled in transitioning teams to modern development methodologies, including Agile and CI/CD pipelines. Adept at collaborating across diverse teams to deliver innovative, high-quality software solutions aligned with organizational goals.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML, CSS, SCSS, Tailwind, Bootstrap

Backend: Node.js, Express, Golang, REST APIs, MongoDB, Postgres

DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Linux, GCP

EXPERIENCE

FULL-STACK DEVELOPER - CONSULTANT | COLLEGE OF ARTS AND MEDIA | REMOTE | SEP 2024 - PRESENT

- **Collaborated with stakeholders to diagnose system bottlenecks** and recommend **scalable solutions** during **enterprise-level software transitions**.
- Designed and implemented **system-wide authentication** upgrades to safeguard sensitive data.
- **Presented detailed proposals** for improving application performance and scalability, **emphasizing Agile team collaboration**.
- **Built investigative applications** to automate data validation, reducing error rates and enhancing accuracy for reporting systems.

FREELANCE FULL-STACK DEVELOPER | MAY 2024 - PRESENT | *Clients: Learning Resources Center, Guerilla Sports, College of Arts and Media, University of Northern Arizona*

- Delivered a **React- and Node.js-based digital signage platform**, replacing legacy AppleTV architecture for improved scalability and user adoption.
- **Automated provisioning** of Raspberry Pi OS using Ansible, **enhancing deployment efficiency** across enterprise networks.
- Developed a **Golang API to remotely manage** signage devices with **secure authentication** and seamless data flow.
- Supported university-wide application management transitions, including **Agile methodologies** and process streamlining.

LEAD SOFTWARE DEVELOPER | LEARNING RESOURCES CENTER | DENVER, CO | APRIL 2021 - MAY 2024

- **Spearheaded the development** of a multi-functional admin platform using **React, Next.js, and AWS Lambda**, reducing load times by 80% and improving user productivity by 60%.
- **Transitioned development workflows to Agile methodologies**, establishing sprint cycles and promoting team-wide adoption.
- Designed and integrated RFID scanning systems to enhance analytics accuracy, improving operational efficiency by 70%.
- Delivered RESTful APIs foundational to **scaling internal tech infrastructure**, enabling **cross-team development** with minimal friction.
- **Led workshops** on new system features, achieving a **50% reduction in onboarding time for Agile teams**.

EDUCATION

BFA in Digital Design (UX/UI Emphasis) *University of Colorado Denver*

PERSONAL PROJECTS

PMDB: Social app to help users discover movies/TV shows. Built with **Golang, Postgres, Redis, and React**, incorporating streaming service integration and real-time multi-user sessions.

Echo: AI-driven interaction platform built with React and the OpenAI API. **Deployed on AWS EC2** with Nginx and SSL for secure, scalable functionality.

HomeLab: Smart home automation platform utilizing **Ubuntu server, Docker, and custom APIs** to manage containerized services. Demonstrated expertise in **server management and infrastructure**.
