Hiring Manager
Scholarly

Dear Hiring Manager,

I am thrilled to apply for the Software Engineer position at Scholarly. With extensive experience in higher education and a strong commitment to enhancing the student and faculty experience through innovative software solutions, I am eager to contribute to Scholarly's mission of building next-generation software for higher education.

During my tenure as a Full-Stack Developer at the University of Colorado Denver's Learning Resources Center, I led the development of several high-impact projects that significantly improved user satisfaction and operational efficiency. My work involved transforming clunky, traditional applications into efficient, user-friendly solutions. I am passionate about creating software that enables data-driven decision-making and automates essential processes, much like the vision at Scholarly.

While I may not have five years of experience with Ruby on Rails, I am an eager and fast learner with a strong foundation in full-stack development. I have a proven track record of quickly adapting to new technologies and frameworks. My curiosity and dedication to continuous learning have always driven me to excel in my roles, and I am confident in my ability to quickly become proficient in Ruby on Rails.

Key highlights of my qualifications include:

- **Extensive Experience in Higher Education:** Over four years of experience developing software solutions tailored to the needs of students and faculty, with a focus on improving user experience and operational efficiency.
- **Technical Skills:** Proficient in JavaScript, HTML, CSS, and various relational databases such as MySQL and PostgreSQL.
- **Collaborative Mindset:** Demonstrated ability to work closely with cross-functional teams, including direct collaboration with CEOs and CTOs, to define and challenge product requirements and seek customer feedback.
- **Commitment to Excellence:** Passionate about building great software from the ground up, with a strong focus on customer satisfaction and continuous improvement.

I am particularly excited about the opportunity to work closely with Scholarly's experienced and motivated team. I believe that my background in higher education, coupled with my technical skills and dedication to bettering the user experience, aligns well with the goals and vision of Scholarly.

Thank you for considering my application. I am eager to bring my experience and enthusiasm to Scholarly and contribute to building the future system of record for higher education. I look

forward to the opportunity to discuss how my background, skills, and passion align with the needs of your team.

Best regards,

Caleb Theil
