

PROFESSIONAL SUMMARY

Passionate full-stack developer with expertise in TypeScript, React, Next.js, and both SQL and NoSQL databases. Proven ability to lead projects from ideation to deployment, achieving significant improvements in user experience and system performance. Skilled in data analysis, scripting, and reporting with a focus on resolving discrepancies and presenting actionable insights to stakeholders. Strong collaborator in team environments, contributing to high-quality codebases and innovative solutions.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML, CSS, SCSS, Tailwind, Bootstrap

Backend: Node.js, Express, Golang, Python, MongoDB, Postgres, REST, SQL, NoSQL

DevOps: GCP, AWS, Docker, GitHub Actions, CI/CD, Linux

EXPERIENCE

FULL-STACK DEVELOPER - CONSULTANT | COLLEGE OF ARTS AND MEDIA | REMOTE | SEP 2024 - PRESENT

- Developed **investigative applications and scripts** with Python to **diagnose performance issues** and data discrepancies.
- Conducted **data quality audits** and generated detailed reports, highlighting discrepancies and **providing actionable recommendations** to stakeholders.
- **Collaborated with cross-functional teams** to troubleshoot and refine scripts, enhancing their accuracy and efficiency.
- Implemented **security features** using advanced authentication techniques to **protect sensitive data** and prevent malicious activity.
- Prepared presentations outlining **system design improvements** for **enhanced scalability and performance**.

FREELANCE FULL-STACK DEVELOPER | REMOTE | MAY 2024 - PRESENT

- Re-developed DigiSign from AppleTV to web using React and Node.js, enhancing accessibility and user experience.
- **Automated Raspberry Pi OS provisioning** for digital signage with Ansible-playbook scripts.
- Developed a **Golang API for remote management** of signage devices, secured with **robust authentication via ngrok tunnel**.

LEAD SOFTWARE DEVELOPER | LEARNING RESOURCES CENTER | DENVER, CO | APRIL 2021 - MAY 2024

- Designed and developed multiple platforms, including a central online platform with React, Next.js, TypeScript, and Firebase. Improved admin efficiency by 60%, reduced client load time by 80%, and enhanced code quality and lighthouse scores by 30%.
- Integrated RFID scanners in iPadOS for enhanced student analytics and targeted communication. **Increased data collection accuracy by 70% and reduced manual data entry time by 80%.**
- Implemented RESTful APIs using Node.js and Express, foundational for LRC tech infrastructure.
- Led training sessions, improving team proficiency and adoption of new features. **Enhanced team proficiency by 60%, reducing the learning curve for new features by 50%,** and increasing overall productivity by 20%.

EDUCATION

BFA in Digital Design (Emphasis in UX/UI Design) | University of Colorado Denver | 2024

PERSONAL PROJECTS

PMDB: A social app designed to help users find what to watch next. Built with Golang, Postgres, Redis, and React, it supports solo and multi-user sessions, custom watchlists, and streaming service integration.

Echo: An AI interaction platform built with React and the OpenAI API. Hosted on EC2 with Nginx and SSL, Echo enhances AI-driven conversations and provides tools for effective prompt engineering.

HomeLab: Built an automated smart home system using Ubuntu server, Docker, Home Assistant, and custom APIs. Streamlined home automation, showcasing server management and containerization skills.
